New York, July 1.—Prime mer
came ladditions from yearly income brought this figure up to \$18,930,191 of the \$26,
200,000 stock outstanding.

Early in the day there were sales it stock for cash at \$60. The stock sold at that price on April 22 of this year, but never higher. The regular quarterly dividend of 2 1-2 per cent. Came off to-day, and when the stock sold ex-dividend at \$49 the discrepancy with the cash price brought out the information that the special disbursements announced only to-day were payable to stockholders of record to day. Only buyers of the stock for cash to-day, therefore, would be entitled to the extra dividends. The closing quotation was \$10 bid, \$50 asked.

The trading in the stock market in general was almost stagnant and news was of but little effect. The Lackwanna announcement was responsible for a firm tone in Reading and the other coalers. Grain crop news was favorable. The payment in progress of upwards of \$200,000 on account of July disbursements left the money market easy, both for call and time loans. The July payments had the effect of lowering discount rates abroad.

The strike of tinplate workers did not prevent a rise of a point in loans. The July payments had the effect of lowering discount rates abroad.

The strike of tinplate workers did not prevent a rise of a point in United States Steel, and gains were general at the end of the day. Bonds were steady; total sales, par value.
